The objective of this course is to challenge the faulty thinking errors and self-defeating behaviors associated with retail and other forms of theft.

Retail companies face an onslaught of different forms of theft from employees, vendors, and customers. When you add damaged goods, their shrinkage could be more than their profit. This is one of the shortest courses, but it hits hard and direct. There are several reasons why a person could be shoplifting, including kleptomania and other forms of mental illness. The most effective and least costly tool that exists to counter these problems is cognitive restructuring.
